BROAD LEAVED EVERGREENS

***Ilex opaca*—AMERICAN HOLLY**

We grow hollies in pots to insure transplanting success. Potted hollies make excellent house plants for one winter, serving as Christmas decoration. After May first they must be taken out of the pot and planted in good light soil free from lime. As they come from our nursery potted hollies may be planted out any time in spring or early fall.

ARDEN HOLLY

Our best variety, fast growing, hardy, and sure to bear good crops of large bright berries if there is a staminate tree in the neighborhood to pollinate it.

In 4-inch pots	4 inches	— \$1.
6	8	1.50
6	10	2.
8	12	3.
8	15	4.

PISTILLATE HOLLY Will have berries if pollinated

In 4-inch pots	\$1.
6	1.50

STAMINATE HOLLY Will not have berries, but necessary for pollinating

In 4-inch pots	\$1.

We do business on the customary nursery terms.

We give no guarantee of any kind, but make every possible effort to furnish only plants of high quality and in good condition.

We reserve the right to make an extra charge for packing and delivery of small orders, and for delivery of orders at a distance from the nursery.

Shipping is at the purchaser's risk.

We are equipped to do the planting when desired, and for this a small extra charge will be made, approximately cost.

We much prefer to deliver by truck rather than ship by rail, as the quicker handling of all classes of plants means fewer losses.
